### Abstract of JP2004159812

**PROBLEM TO BE SOLVED:** To provide a power source management system of an ultrasonograph with which the management of the power supply to each electronic unit connected to the ultrasonograph can be performed easily.

**SOLUTION:** When an ultrasonograph operator turns on a user SW 36, a power source controller 20 of a power source managing unit 18 is driven through an on-off controlling circuit 28 of a power source unit 12. Simultaneously, the on-off controlling circuit 28 of the power source unit 12 is driven. When the power source controller 20 is driven, the power source controller 20 controls individual power sources 26a-26n so that the on-off controlling circuit 28 of the power source unit 12 turns on the power supply to individual electronic units 16a-16n in a prescribed controlling sequence.
